Réf : AF-26-029-En / KF

STATEMENT

To date, the European standard, EN 4179 mentioned in paragraph C.2.10:

Specific and practical exam – C.2.10

- When a NANDTB is used, the specific and practical exams may cover a wider scope that does not include all of the employer's requirements. Where the NANDTB uses a wider scope, the employer is responsible for administering additional specific and practical exams that are representative of the employer's processes. These additional examinations must be under the control of an employer or a NANDTB if the national aviation authority requires it.

For the French NANDTB "FrANDTB" the following is applied:

Specific Examination – the specific questions are specification numbers and international standards communicated by the French Principals according to ADL in the appendix, effective March 1, 2025.

Practical Exam – the French NANDTB "FrANDTB", account of the main field of activity of the candidate indicated by the company.

André BAILLARD
Chairman, FrANDTB Technical Committee

Appendix – List of Applicable Documents – OPEN BOOK – Effective March 1, 2025 (1/3)
